MUHAMMAD ALIF HAZIQ BIN ROSLI

Puchong, Selangor | 018 - 4650914 | alifhaziq79@gmail.com |
LinkedIn : Haziq Rosli

Software Engineer (BackEnd)

Software Engineer (BackEnd) with 4 years of experience delivering web applications for government and enterprise clients. Skilled in C#, ASP.NET Core, MVC, Web API, and scalable architectures using Repository Pattern and Clean Architecture. Experienced with MSSQL, PostgreSQL, MongoDB, CI/CD, Azure DevOps, and Docker. Proven ability to improve performance, automate workflows, and deliver maintainable backend services and responsive frontends.

EXPERIENCE

Software Developer **January 2024 - Present**
FGV Prodata Systems Sdn. Bhd, Kuala Lumpur

MyInvois (LHDN)

- Led application deployments and ensured stability across production and UAT environments.
- Developed backend APIs using .NET Core Web API, improving data accuracy and system reliability.
- Built responsive React components, enhancing user workflow and reducing UI-related support issues.
- Reviewed PRs in Azure DevOps to maintain coding standards and reduce defects before deployment.
- Supported CI/CD, release pipelines, and Agile sprints for timely delivery.

MyInvois Feedback Form (Helpdesk System)

- Developed a .NET MVC helpdesk application used by taxpayers and internal staff.
- Implemented backend workflows, automated email notifications, and input validation, reducing manual handling by ~50%.
- Delivered maintainable, secure code for a high-demand system used by the support team.

Technologies: C#, .NET Core, MVC, Web API, React, JavaScript, Azure DevOps, Azure Portal

Back End Developer **January 2022 - January 2024**
Cloud Connect Sdn. Bhd, Shah Alam, Selangor

Key Achievements:

Aset Alih Management System

- Developed enterprise backend services using ASP.NET Core MVC & Web API (.NET 5), improving system performance and stability.
- Designed hybrid PostgreSQL + MongoDB architecture, optimizing query efficiency and data workflows.
- Implemented Repository Pattern and Onion Architecture, increasing code maintainability and reducing defects during releases.
- Automated scheduled tasks using Hangfire, reducing manual processing time by 30–40%.
- Built frontend modules using Vue.js/Nuxt.js, enhancing usability for internal users.
- Supported CI/CD pipelines and Git-based deployments, enabling faster and more reliable releases.

Modern IT Training (Government)

- Delivered training sessions for government officers on modern .NET development, improving participants' coding standards and productivity.
- Conducted hands-on workshops for .NET Core, MVC, Web API, and frontend frameworks.

Technologies: .NET 5, EF Core, PostgreSQL, MongoDB, Vue.js, Nuxt.js, Hangfire, Git, CI/CD

KEY SKILLS

Backend / Programming

- C#, ASP.NET Core, .NET 5–8
- MVC, Web API, Blazor
- Entity Framework Core, LINQ

Architecture & Patterns

- RESTful API
- Repository Pattern
- Onion Architecture

Frontend (Basic Knowledge)

- Vue.js, Nuxt.js, React
- JavaScript, TypeScript
- Bootstrap 4/5
- HTML/CSS

Databases

- MSSQL, PostgreSQL
- MongoDB, CosmosDB

Tools & DevOps

- GitHub / GitLab
- CI/CD pipelines
- Azure Devops, Azure Portal
- Hangfire
- Docker

Soft Skills

- Fast learner, teamwork, communication
- Requirement analysis
- Problem-solving

EDUCATION

Diploma in Engineering Electronics Computer **2018 - 2021**

Politeknik Tuanku Syed Sirajuddin, Perlis (PTSS)
